EXECUTIVE SUMMARY

Technology Delivery Leader and Senior Program Manager with 18+ years of experience driving large-scale enterprise programs, digital transformation, and Agile delivery at scale across global, complex environments. Proven ability to lead multi-team portfolios**,** optimize delivery execution, and build strong CXO-level stakeholder partnerships to achieve strategic business outcomes.

Expert in Enterprise Portfolio Delivery, Scaled Agile (Scrum/SAFe), governance, risk management, and DevOps-led transformation, with a consistent focus on improving delivery predictability, release velocity, and operational stability. Successfully led cross-functional teams, mentored delivery leaders, and enabled organizations to adopt agile ways of working at scale.

Strong background in quality engineering and software testing strategy, ensuring robust, scalable, and high-performing systems. Recognized for turning around underperforming programs, driving efficiency gains, cost optimization, and measurable business impact.

In addition to enterprise delivery leadership, actively provide consulting and coaching to professionals and organizations on Agile delivery, project execution, and real-world problem solving.

Known for a pragmatic, outcome-driven leadership style that bridges strategy and execution. Currently seeking Delivery Head / Director / AVP roles to lead large delivery organizations, drive transformation agendas, and build high-performance, future-ready teams.

CORE COMPETENCIES

- Managed Services Delivery Leadership
- Portfolio Governance & OKRs
- SLA / KPI Governance & Service Excellence
- P&L Ownership, Budgeting & Margin Optimization
- Client & CXO Stakeholder Management
- ITIL / ITSM (Incident, Problem, Change Management)
- Pre-Sales, RFP, SOW & Solutioning
- Cloud Transformation (AWS / Azure)
- Revenue Ownership / P&L Management
- DevOps, Automation & Continuous Improvement (CSI)
- Risk, Escalation & Compliance Management
- Global Delivery & Offshore Model Leadership

PROFESSIONAL EXPERIENCE

- **Program Manager | TEKsystems (Client: Cisco) | Oct' 2021 – Apr'2026**
  Leading strategic delivery and transformation programs for telecom platform initiatives supporting Cisco's enterprise ecosystem.
  Key Leadership Contributions:
  - Led a 32-member cross-functional organization delivering multi-million-dollar telecom transformation programs across global markets.
  - Managing end-to-end delivery lifecycle including planning, governance, risk management, and stakeholder reporting for telecom platforms.
  - Implemented DevOps CI/CD pipelines improving release velocity and reducing deployment cycles across multiple applications.
  - Introduced incident triage and proactive monitoring frameworks, significantly improving operational stability and reducing MTTR.
  - Led Agile transformation initiatives, establishing Scrum practices, delivery metrics, and governance dashboards for leadership visibility.
  - Drove knowledge transformation programs to upskill teams on critical telecom platforms including ISAAC applications.
  - Managed integration and deployment of telecom solutions across OMS, CRM, and service provisioning platforms.

- Delivered data-driven reporting and program governance for executive stakeholders.
    - **Business Impact:**
        - Improved delivery efficiency and release cycles through DevOps automation and Agile adoption.
        - Enhanced system stability through structured incident management framework.
        - Strengthened cross-team collaboration and engineering productivity.

- **Project Manager | TestingXperts (Client: Frontier Communications) | Jul' 2020 – Oct' 2021**
  Led large-scale delivery programs for telecom customer platforms and cloud modernization initiatives.
  Key Leadership Contributions:
  - Managed Agile delivery teams of 40+ engineers delivering telecom CRM and service management solutions.
  - Turned around an underperforming PEGA program, transforming it into a profitable engagement.
  - Delivered cloud-based applications on AWS, ensuring scalability, security, and performance optimization.
  - Led application modernization and technology stack migration initiatives.
  - Implemented workflow automation and DevOps improvements, enhancing operational efficiency.
  - Worked closely with executive stakeholders and product leadership to align delivery with strategic business goals.
    - **Business Impact:**
        - Achieved $1M+ cost savings through delivery optimization and automation initiatives.
        - Improved system efficiency by 30% through modernization and debugging of legacy systems.
        - Enabled new product and service launches through Agile delivery model transformation.
- **Project Manager | Tech Mahindra (India & USA) | Mar' 2010 – Jan'2020**
  Delivered multiple telecom transformation programs supporting global telecom operators and technology vendors.
  Key Contributions:
  - Managed large distributed teams across US and India for telecom application development and testing programs.
  - Led delivery for OSS/BSS platforms including CRM, Order Management, and service provisioning systems.
  - Established Agile delivery frameworks and governance models for telecom product development.
  - Coordinated with client leadership, architecture teams, and vendors to ensure program success.
  - Managed end-to-end program lifecycle including planning, execution, risk management, and delivery governance.
- **Software Test Engineer | GSPANN Software Technologies | Jun' 2008 – Mar' 2010**
- **Software Test Engineer | STW | Aug' 2006 – May' 2008**
